

Logging Out - lower right corner of systray, click person icon and <Sign Out>; This is also where the shut down is.

There is an Apps icon in the quick launch area to see the installed apps. Extension show up near the 3 lines on the upper right of the screen in Google Chrome. Need to be logged into Google Chrome also to see extensions. Use your Google Apps log in.

You can put apps in quick launch bar - example, I added Google Drive.

Connecting to different wifi networks works like most computers - in the systray also.

We are managing this device and not allowing apps/extensions to be placed on it. We want you to get the feel how this would work. Use Google Chrome icon in ZCM on your teacher pc and explore and install extensions/apps. How to find them: Open new tab in Google Chrome and you should see an icon for the Chrome Web Store. Click in the Search Apps box and you can click on Extensions tab off to the right as well.

When you find something you like and want it on the Chromebook, create a Help Desk ticket and the tech dept. will push them down to the Chromebook. I pushed several to the device so you can see how they look.

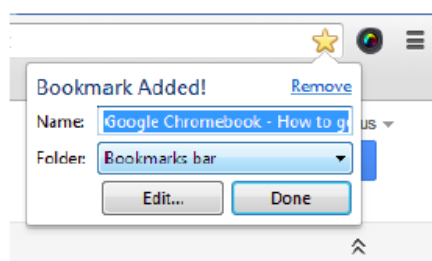

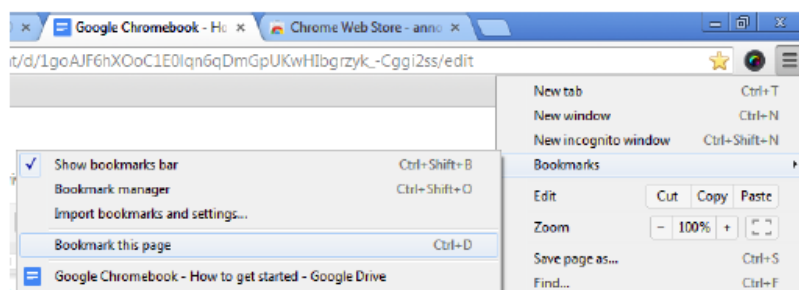

Two finger tap on the touch pad to get right-click.

Scrolling is dragging two fingers on the touch pad.

Shift/Search key will turn on caps lock.

If device locks up - dark blue screen - reset on bottom

Take a screenshot of what is showing on the device: Hold Ctrl key & tap the 6th button from the left across the top (switch window button - has was looks like 3 windows stacked up); Puts in apps / files / downloads as a .png file. Can e-mail or insert into a document.

Can create URL bookmarks -
